15. Educational aims of the programme:

A joint honours degree is one that allows you to study more than one subject and then combine them into a single qualification. This programme will allow you to explore more than one area of interest and help you to understand a range of key issues, debates and concepts in both of your chosen academic disciplines. The joint honours programme is a particularly good choice if you wish to follow a broader and more flexible programme and keep your future career options open. There will be an opportunity at Level 5 to specialise when deciding which of the two disciplines in which to write your dissertation.

The BSc (Hons) Sociology with Criminology aims to provide students with knowledge of the interrelated fields of criminal behaviour and society's response to it, as well as an understanding of how crime is related to other social issues in the wider society. The programme considers criminological theories to help further comprehend why individuals deviate from social norms and reflects on the relationship between the law, criminal justice system and society. Closely linked to this is the study of social division and inequality and the relationship between different social groups, social behaviour and changing societies. The degree will develop independent research skills and an enhanced ability in analytical and critical thinking, as well as to equip students with the necessary skills required for a career in a wide range of related professions.

The programme aims:

- To provide students with a sound knowledge and understanding of the core areas and theories in the disciplines of criminology and sociology;
- To enable students to make connections between the two subject areas by developing an understanding of real life applications of theory to experience and behaviour in criminology and sociology including associated ethical issues;
- To enable students to develop independent learning skills and skills for lifelong learning (including literacy, numeracy, written and oral communication and IT skills);
- To stimulate students' intellectual development and powers of critical analysis through the opportunity to undertake independent research using a range of appropriate skills, techniques and methods for investigating experience and behaviour in criminology and sociology;
- To enable the practice and enhancement of interpersonal skills, group working, time management, self-awareness and self-reflection which will enable students to pursue careers in a variety of work environments; and
- To provide students with the appropriate knowledge and skills for relevant employment for which the degree is considered suitable or to undertake postgraduate level study.

16. Programme learning outcomes – the programme provides opportunities for students to develop and demonstrate knowledge and understanding, skills, qualities and other attributes in the following areas:

Intended Learning Outcomes:

- to develop knowledge and understanding in the disciplines of criminology and sociology;
- to develop the cognitive skills of independent research, hypothesis testing and critically evaluating theory, research findings and applications in criminology and sociology, as well as reflecting on one's own abilities;
- to develop an awareness and understanding of ethical issues in criminology and sociology;
- to develop the general transferrable skills of reading, numeracy, communication, time management, using IT and the ability to work independently and as part of a team;
- to develop an awareness of the social and cultural context of criminological and sociological research; and
- to provide students with the appropriate knowledge and skills for relevant employment for which the degree is considered suitable or to undertake postgraduate level study.
